Report 24

June 12, 2025

MMN Slug ID 1048 /Slug Name: MD_DA640

Email us with accessibility issues with this report.

In the West, low/medium heat nonfat dry milk (NDM) prices moved higher for the bottom end of the range, while the top end of the range is unchanged for a second consecutive week. Both ends of the mostly price series moved higher. Domestic demand varies from steady to lighter. Export demand is lighter. That said, manufacturers and traders describe load availability as tighter, which is contributing to the week 24 price movements. Production schedules are generally lighter. Prices for high heat NDM are unchanged on both ends of the range. Demand for high heat NDM is steady. High heat NDM production schedules are mixed.
